MVP user stories:
1. As a new user, I want to be able to create an account
2. As a logged-out user, I want to be able to log in
3. As a logged-in user, I want to be able to log out
4. As a logged-in user, I want to search (using a search form) for local stores and restaurants to look up their estimated waiting times
5. As a logged-in user, I want to enter estimated wait times for local stores and restaurants
6. As a logged-in user, I want to view a full list of user-submitted wait times for local stores and restaurants
7. As a logged-in user, I want to rate the accuracy of other users' estimates of wait times by using a star rating system to determine their trustworthiness
8. As a logged-in user, I want to view a star rating associated with a user to assess whether they are likely to provide trustworthy estimates
9. As a logged-in user, I want to view what time a user submitted an estimated wait time to understand if it is still relevant at a point in time

User stories we won't commit to, but keeping in backlog if we have time/aptitude/resources...
● As a logged-in user, I want to search for other users
● As a logged-in user, I want to add "friends" to follow
● As a logged-in user, I want to view an activity page for another user to see what stores and restaurants they have been
● As a logged-in user, I want to search for local stores and restaurants using a map
● As a logged-in user, I want to sort a list of local stores and restaurants alphabetically or reverse-alphabetically
● As a logged-in user, I want to sort a list of local stores and restaurants by estimated wait time
